ANNUAL INDEX 1967

January/February, 1967 — November/December, 1967

FEATURE ARTICLES

Barnes, James A., and **David W. Allan,** "An Approach to the Prediction of Coordinated Universal Time," No. 6, p. 15.

Bechtold, G. W., V. E. Derr and **W. T. Smith,** "Techniques for Generating, Detecting and Phase Stabilizing Submillimeter Coherent Radiation," No. 4, p. 25.

Breiding, R. J., and **C. Vammen,** "RADA Frequency Synthesizer," No. 5, p. 25.

Cutler, Leonard S., "Present Status in Short-Term Frequency Stability," No. 5, p. 13.

Fletcher, L. B., K. E. Zublin, R. W. Peters, "YIG Tuned Microwave Devices," No. 3, p. 24.

Hekimian, N. C., "Digital Frequency Synthesizers," No. 4, p. 30.

Hudson, Pete H., and **James D. Meindl,** "Low Power Communication Circuits," No. 6, p. 21.

Koch, John G., "Simplifying Great Circle Calculations," No. 6, p. 27.

Pierce J. R., "Reliability in Communications — A BTL View of the Future," No. 1, p. 20.

Skomal, E. N., "Man-Made Noise, Part I — Sources and Characteristics," No. 1, p. 14; "Man-Made Noise, Part II — Experimental Data," No. 2, p. 12.

Sosin, B. M., and **H. Haywood,** "A Frequency Distribution Scheme," No. 4, p. 35.

Thomas, H. P., J. H. Sherman, Jr., R. C. Early, "Microminiature Crystal Oscillator," No. 5, p. 17.

Vale, C. R., "Simplified Tabular Determination of Resonant Frequency/Inductance/Capacitance," No. 3, p. 28.

PULSES AND IMPULSES

Cooper, R. E., and **C. O. Harbourt,** "Active Network Synthesis for Reduced Sensitivity to Parameter Variations," No. 1, p. 34.

Dominick, F. J., "Varactor State-of-the-Art for Paramp Applications," No. 2, p. 32.

Goldblum, R. D., "Designing Shielded Enclosures with Resonance in Mind," No. 4, p. 38.

Graf, Calvin R., "Transmissions From Standard Frequency and Time Station RID," No. 5, p. 40.

Kurzrok, R. M., "Use of Bridging Coupling in General Four-resonator Filters," No. 1, p. 35.

Leo, F. P., "Measuring Sidereal Frequencies to Parts in 10^{11}," No. 3, p. 34.

Markowitz, T., "Microsecond Time Synchronization With WWVL," No. 6, p. 33.

NBS Office of Technical Information, "Novel Instrument Measures Detonation Danger Near Antennas," No. 5, p. 37; "Coaxial Transmission Lines With Minimal Discontinuities," No. 6, p. 36.

Osepchuk, J. M., "Cascade Crossed - Field Tubes Improve Microwave Generation," No. 3, p. 32.

Shackelford, R. G., and **A. P. Sheppard,** "Low-Cost 100 kHz Oscillator With Good Short-Term Stability and Low Noise Spectrum," No. 2, p. 34.

Tanzman, H. D., "Reliable Measurements of Frequency and Resistance Changes of Quartz Crystals Due to Wide Temperature Variations," No. 4, p. 39.

Zamites, C. J., Jr., "Wavemeter Gives 10 MHz Resolution at 100 GHz," No. 1, p. 36.

DESIGN TIPS FROM THE U. S. SPACE PROGRAM

"Omnidirectional Antenna," No. 1, p. 39.

"Interference Suppression Techniques," No. 2, p. 33.

"Optical Superhet," No. 3, p. 49.

"A Monitor to Assure Availability and Quality of Communication Channels," No. 5, p. 36.

"Measuring RF Phase Differences in VHF or UHF Ranges," No. 5, p. 40.

STAFF REPORT

"Satellite Communications: FCC Committee Weighs Plan to Meet U.S. Needs Through 1980," No. 2, p. 18.

CONFERENCE REPORTS

Vehicular Communications Conference, No. 1, p. 22.

NEREM '66, Emphasis on Semiconductor Technology, No. 1, p. 28.

International Solid-State Circuits Conference, No. 2, p. 22.

WINCON '67, Futurist Communications in Embryo, No. 2, p. 28.

Frequency Control Symposium, No. 3, p. 14.

Frequency Generation and Control for Radio Systems, London, No. 4, p. 15.

EMC Symposium, No. 5, p. 33.

ISSUES FOR MARCH/APRIL, MAY/JUNE,

PAGES 9-10 SUBSCRIPTION CARD MISSING

NOT AVAILABLE FOR MICROFILMING
